WORK EXPERIENCE

VIETSTATS Co., Ltd | Front-end Developer

6/2024 - PRESENT

- An economic consulting company that compiles and provides economic data, supporting policy and strategic planning for investors and businesses.

Projects:

<https://vietstats.vn>

- A data platform providing comprehensive economic insights. A web-based system delivering up-to-date data on Vietnam's national indicators, local indicators, and industry indicators. The platform also includes news articles, economic reports, interactive charts, and AI-powered data analysis.
- Technologies used: **Next.js, WebSocket, SASS, Redux-toolkit, Ant Design, Highcharts, ECharts**
- Job Responsibilities: Working with NextJS, ReactJS, Redux, WebSocket, and RESTful APIs. Coded web interfaces and tested functionality. Integrated RESTful APIs and handled data flow. Developed a website providing economic data, charts, economic reports, and news. Built an admin system for uploading and managing economic data, reports, and news. Contributing ideas and suggestions for product improvement.

<https://portal.vietstats.vn>

- A platform that provides economic data charts for embedding in articles.
 - Technologies used: **Next.js, SASS, Tailwind, Redux-toolkit, Shadcn, Highcharts, ECharts**
 - Job Responsibilities: Coded website interfaces, designed admin and user management screens, and integrated APIs.
-

ONECHAIN TECHNOLOGY COMPANY | Front-end Developer

12/2024 - 4/2024

- A technology company specializing in website, game, and blockchain development.

Projects:

<https://saworld.io/>

- A Web3 platform that provides HTML5 games integrated with quest chains, rewarding users with experience points that can be redeemed for items in the system's store.
- Technologies used: **Next.js, Redux-toolkit, Ant Design, SASS, Tailwind**
- Job Responsibilities: Implementing front-end tasks such as UI design, logic, and functionality related to the front end, integrating APIs, mocking APIs when the back end has not yet handled data. Collaborating with and supporting back-end teams in testing APIs. Collaborating with QC teams in bug checking. Contributing ideas and suggestions for product improvement.

<https://aigallery.studio/>

- A website for generating images using AI.
- Technologies used: **Next.js, Redux-toolkit, Ant Design, SASS, Tailwind**

[SASA \(Chrome Extension for Twitter\)](#)

- A Twitter extension that allows users to earn points by liking and sharing posts, and redeem rewards in the store.
- Technologies used: **React.js, Redux-toolkit, Chakra UI, SASS, Tailwind**

<https://sasa.saworld.io/>

- This is the website version of the SASA extension, but it only manages user accounts and reward redemption in the store.
 - Technologies used: **Next.js, Redux-toolkit, Chakra UI, SASS, Tailwind**
-

MINH THUAN WEBSITE DESIGN COMPANY | Front-end Developer

6/2022 - 12/2022

- A company specializing in providing affordable websites for clients, especially small business owners.
 - Job Responsibilities: Using CMS tools to create websites based on client requirements.
-

FREELANCE PROJECTS | Front-end Developer

Projects:

<https://digdig.app/>

- Outsource Project for Japanese Client. A second-hand e-commerce system built for the Japanese market, allowing users to buy and sell pre-owned items such as clothing, shoes, and personal goods.
- Technologies used: **Next.js, Redux-toolkit, SASS, Next.js, Shopify**
- Job Responsibilities: Supported the team in bug fixing and testing, API integration and coded several UI components.

SWIPEDRAMA

- A movie and short video streaming app built with React Native.
- Technologies used: **React Native**
- Job Responsibilities: Supported the team in bug fixing and testing, API integration and coded several UI components.
